BEDDING

The Largest Furniture and Carpet Establishment in the World.

Having just transferred to my warrrooms from the factories an immense stock of goods manufactured trevious to the late advance in prices. I am preserved to odie at lower figures than the present cost of manufacture. The greatest care and strictest attention have been given to their manufacture, the aim being to turn out a reliable article at a lower figure than it could be procured anywhere else. My stock is now submitted to the public, knowing this object has been obtained. In preparing the goods for the market, style, durability, and cheapness have been constantly kept in view, and the best workmen employed and materials used, under my own supervision. However, the first home at figures very much below current prices. Intending purchasers should immediately avail them solves of the undombted bargains now being offered, as such a chance is not likely to occur again. I have also just received from the Custom House 500 bales of different grades of Carpet, specially imported, which I am able to sell at figures below the price of Domestic Goods.
